EDUCATION

2025 - present	PhD in Geophysics <i>University of Iceland — Reykavik, Iceland</i>	
2020 - 2022	MSc in Geology and Geodynamis <i>University of Milano-Bicocca — Milano, Italy</i>	(110/110 cum laude)
Thesis	New tools for Digital Outcrop Models analysis: Implementation for the PZero software	
Keywords	Structural geology data analysis, Full stack development, Principal Component Analysis, Automatic segmentation, Clustering algorithm, VTK	
2017-2020	BSc in Geological and Geotechnical sciences <i>University of Milano-Bicocca — Milano, Italy</i>	(107/110)
Thesis	Photogrammetric techniques applied to invertebrate paleontology	
Keywords	Photogrammetry, Agisoft Metashape, Preservation and archival	

WORK EXPERIENCE

University research assistant	Feb 2023 - Aug 2025
<i>University of Milano-Bicocca — Milano, Italy</i>	
• Point cloud segmentation procedures for fracture planes extraction • Right censoring bias estimation and correction for fracture length statistical modelling • Stochastic DFN parameter calibration	
Programmer	May 2022 - Feb 2023
<i>Pro Iter Ambiente s.r.l. — Milano, Italy</i>	
Development of the PZero software	
• User interface and quality of life improvements • Backend refactorization • Wells and geophysical profiles integration • Streamline input and output with CAD/BIM environments	
Programmer	Nov 2019 - Dic 2019
<i>Freelance — Milano, Italy</i>	
Designed and programmed an Agisoft Metashape compatible pipeline to calculate the elevation difference between two models.

AWARDS AND GRANTS

- | | | |
|------|---|------------------------------------|
| 2026 | Erasmus+ traineeship | (ML4SEG) |
| | Machine learning for Solid Earth Geosciences and Earthquake Physics | |
| 2024 | Best student presentation award | (DRT24 — <i>Barcelona, Spain</i>) |
| | Scale independent unbiased statistical length analysis of linear features: Adapting survival analysis techniques to geological applications | |
| 2024 | Outstanding Student Presentation and Poster award | (EGU24 — <i>Wien, Austria</i>) |
| | FracAbility: A python toolbox for survival analysis in fractured rock systems | |

CONFERENCES

2026	Machine learning for Solid Earth Geosciences and Earthquake Physics (ML4SEG)	(Catania, Italy)
2026	European Geosciences Union (EGU26) [link]	(Wien, Austria)
2025	European Geosciences Union (EGU25) [link]	(Wien, Austria)
2024	Deformation Mechanisms, Rheology and Tectonics (DRT24)	(Barcelona, Spain)
2024	European Geosciences Union (EGU24) [link]	(Wien, Austria)
2024	Tectonic Studies Group (TSG24)	(St. Andrews, UK)
2023	Congresso congiunto SIMP, SGI, SOGEI, AIV	(Potenza, Italy)
2023	European Geosciences Union (EGU23) [link]	(Wien, Austria)

SOFTWARE

- [HighSeas.jl](#) — SEAS simulations with High Performance Computing in mind ([Zenodo](#))
- [Fracability](#) — Python toolbox to analyse fracture networks for digitalized rock outcrops ([Zenodo](#))
- [Squiggles.jl](#) — Julia package to accelerate 1D cross correlations of seismic signals using any GPU
- [Fractalizer.jl](#) — Fractalize any shape
- [SirGridsAlot](#) — Lighting fast tilable regular grids in python

SKILLS

Languages	Italian (Native), English (Fluent)
Programming languages	Python, Julia, CUDA, MATLAB, Bash, CSS/HTML
Libraries	numpy, pandas/geopandas, shapely, VTK/pyvista, Makie.jl, CUDA.jl, DiffEq.jl
Software	Arc/QGIS, Agisoft Metashape, PZero/SKUA/Petrel/Move, Blender, FreeCAD/KiCAD
Technologies	Git, L ^A T _E X, Markdown, SLURM, Docker, ssh
